

Attachment no F/39392/08/25 to the Test Report

Product name: Restorative Cream for Dry & Flaky Skin
Sample number: 39392/08/25
Test type: In-use test (sensitive skin)
Test start date: 01.09.2025
Test end date: 02.10.2025

Test purpose

Aims of the study:

- assessment of long-term sensitive body skin tolerance to the tested product;
- assessment and verification of the performance (properties) of the product declared by the Manufacturer;
- consumer evaluation.

Microbiological purity test

Microbiologically approved product.

The microbiological purity tests were carried out in GBA POLSKA Laboratory / ~~delivered by the Customer.~~

Dermatological test

Dermatologically approved product.

The dermatological tests were carried out in GBA POLSKA Laboratory / ~~delivered by the Customer.~~

Product characteristics

PARAMETER	DESCRIPTION

Qualitative composition of the product

INCI (**):

Aqua, Urea, Sodium Phytate, Sodium Levulinate, Sodium Anisate, Niacinamide, Aloe Barbadensis Leaf Juice Powder, Sucrose Stearate, Glycerin, Xanthan Gum, Glyceryl Stearate, Copernicia Cerifera (Carnauba) Wax, Sodium Stearoyl Lactylate, Cetearyl Alcohol, Oenothera Biennis (Evening Primrose) Oil, Helianthus Annuus (Sunflower) Seed Oil, Avena Sativa (Oat) Kernel Oil, Simmondsia Chinensis (Jojoba) Seed Oil, Cannabis Sativa Seed Oil, Cannabidiol, Borago Officinalis Seed Oil, Cyanocobalamin, Methylsulfonylmethane, Ganoderma Lucidum Extract, Inonotus Obliquus (Mushroom) Extract, Cordyceps Sinensis Extract, Lactobacillus Ferment, Colloidal Oatmeal, Bisabolol, Tocopherol, Salicylic Acid, Salix Nigra (Willow) Bark Extract, Centella Asiatica Extract, Potassium Sorbate, Sodium Benzoate, Benzyl Alcohol.

(**) – The Customer is fully responsible for the compliance of the samples delivered for testing with the declared qualitative composition; the Laboratory does not analyze the composition of the sample for compliance with the current legal requirements.

The scope of the tests is in accordance with:

- Regulation of the European Parliament and Council Regulation (EC) No 1223/2009 of 30 November 2009 on cosmetics
- Regulation of the European Parliament and Council Regulation (EC) No 655/2013 of 10 July 2013 on cosmetics
- Cosmetics Europe - The Personal Care Association Guidelines „Product test Guidelines for the Assessment of Human Skin Compatibility 1997”
- Cosmetics Europe - The Personal Care Association „Guidelines for the Evaluation of the Efficacy of Cosmetic Products 2008”

Research methodology

Application test was carried out:

- according to the internal procedure of the Cosmetics Research Centre, PB-34/LK;
- under the guidance of a specialist and a dermatologist;
- on a group of 20 study subjects with sensitive skin at home.

The tested sample was used in accordance with the Manufacturer's recommendations. After the declared time of application, the subjects were asked to fill in the evaluation questionnaire according to their own feelings. In the evaluation sheet, in the part containing the Manufacturer's declarations, a 4-point scale was used, with an equal number of positive and negative answers.

A declaration may be confirmed when the sum of positive answers exceeds 50% of the assessments of all subjects.

The test results may be influenced by factors such as: the type and condition of the body skin, lifestyle, genetic conditions, individual preferences, environmental conditions.

Product effects / properties declared by the Manufacturer

The effects / properties of the product declared by the Manufacturer are included in the questions of the evaluation questionnaire.

Selection of the Study Subjects

The selection of the Study Subjects was conducted in accordance with the Research Procedure PB-34/LK, taking into account:

- the Declaration of Helsinki of 1964 (with subsequent amendments)
- Current Polish and European legal regulations
- Cosmetics Europe directives with use of inclusion and exclusion criteria

20 volunteers (all with sensitive skin) were selected for the study. They completed a detailed questionnaire regarding their lifestyle, current health condition, past illnesses, eating habits, use of medicines and stimulants. All volunteers selected for the study met the requirements for inclusion in the study and signed consent to consciously participate in it. They were also informed about the purpose of the study, method of testing and about possible side effects.

All study participants were obliged to:

- use the product regularly during the period of 4 weeks, as recommended by the Manufacturer,
- not to use any other products with identical or similar purpose and properties during the tests,
- not to change, for the entire duration of the test, the products for care of the body skin used so far, intended for purposes other than the tested product,
- immediately discontinue the use of the product and to report to the specialist and/or dermatologist supervising the research in case any undesirable effects occurred.

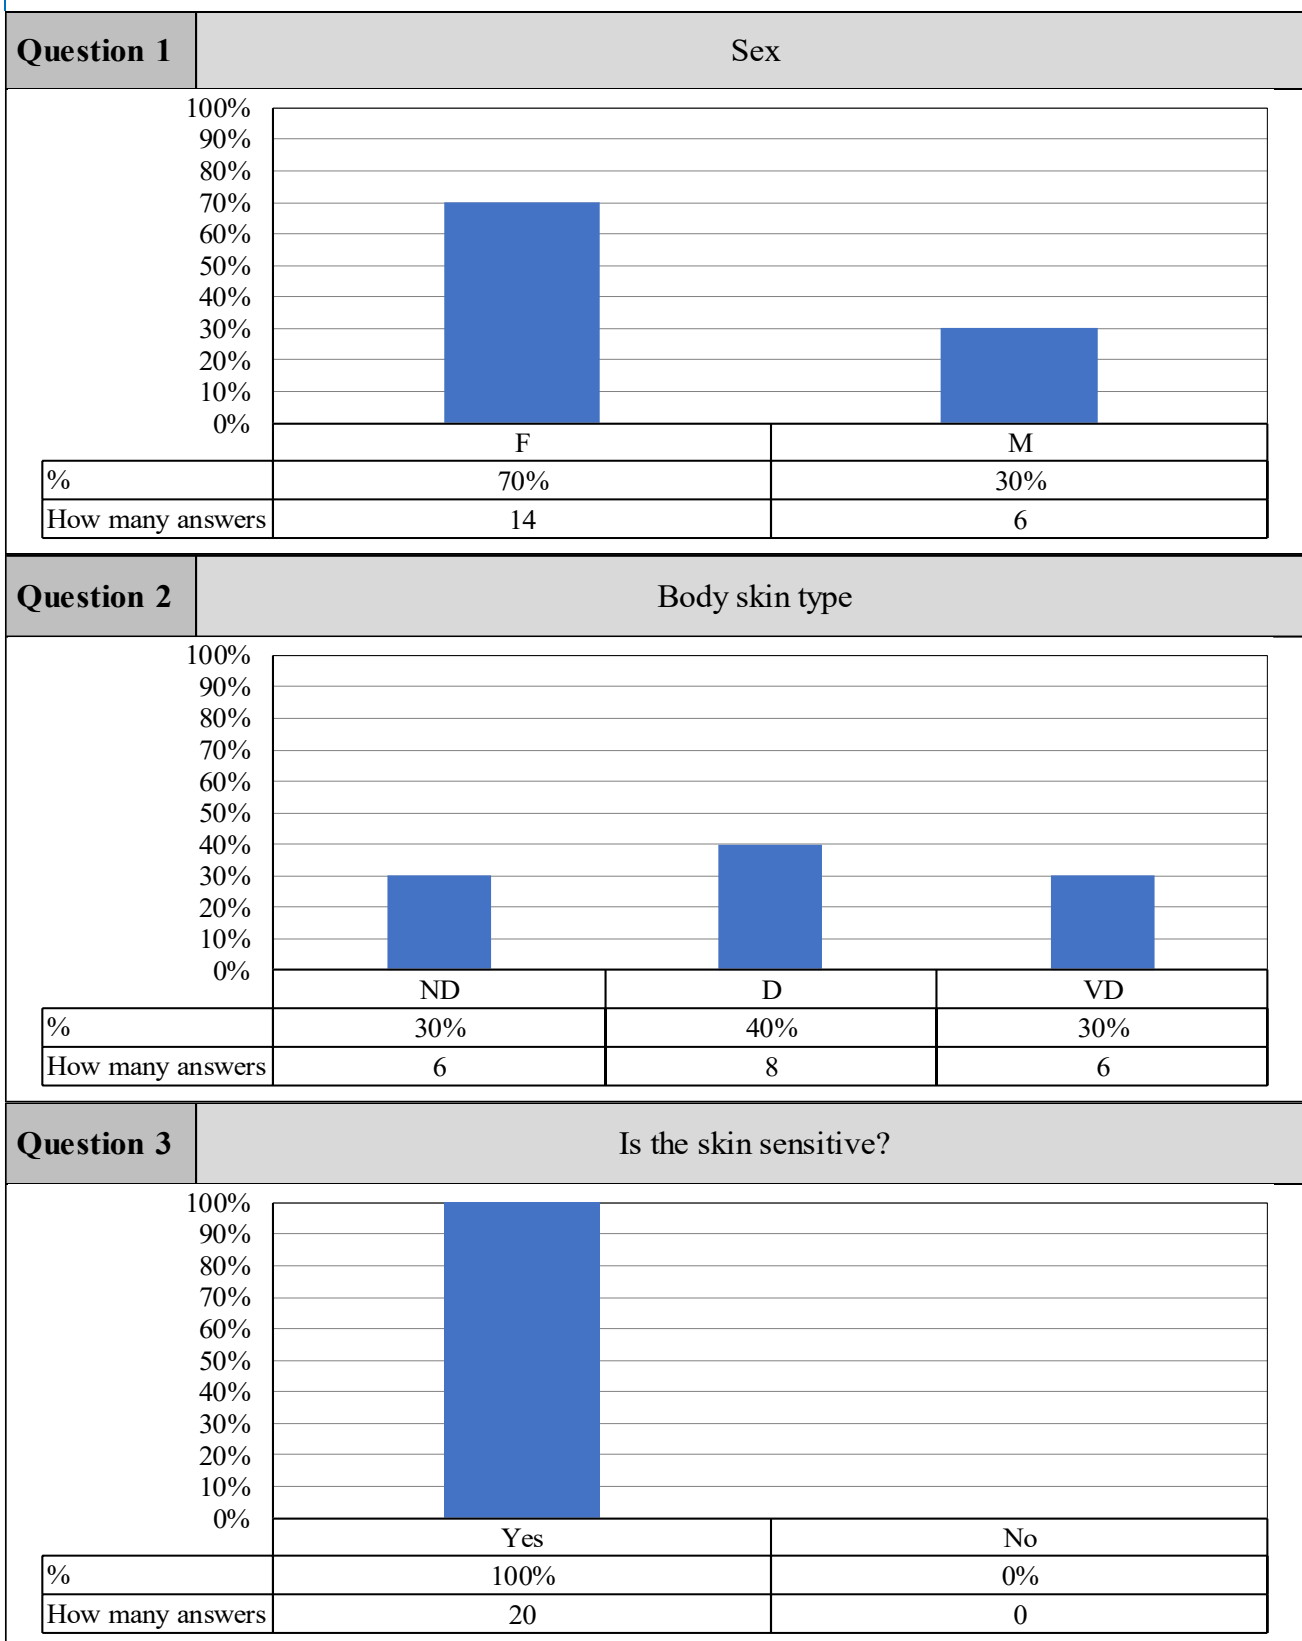

Characteristics and composition of the group participating in the study

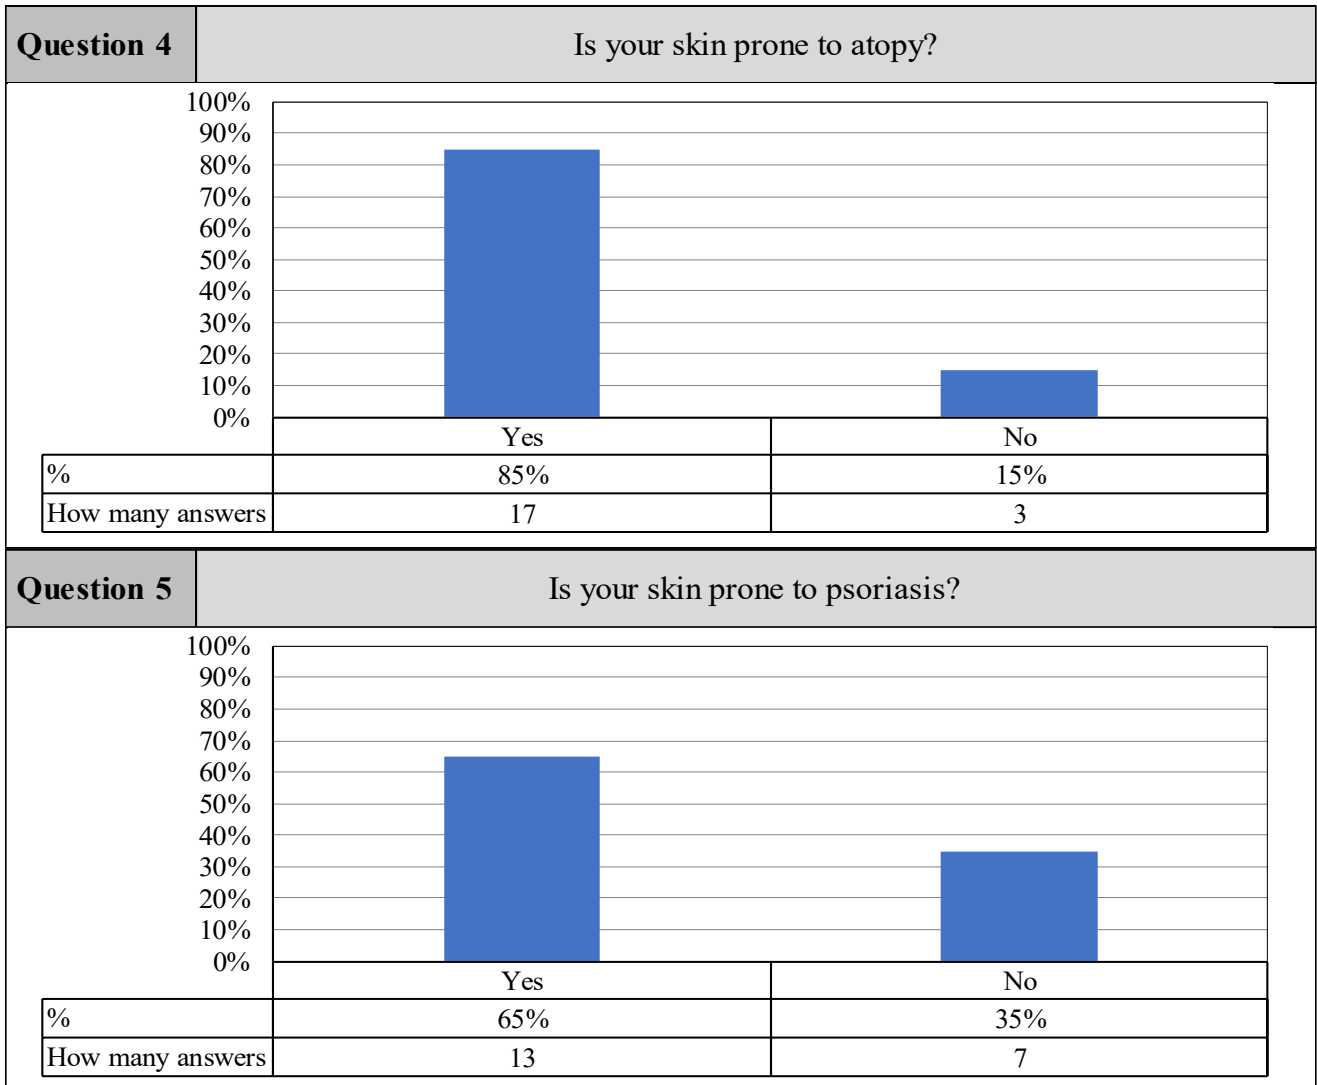

The study was conducted on a group of 20 subjects with sensitive skin selected according to the directions.

Subject's code	Age	Sex	Body skin type	Is the skin sensitive?	Is your skin prone to atopy?	Is your skin prone to psoriasis?	Feelings / side effects

4. MARKETING EVALUATION

5. DERMATOLOGIST'S OPINION

Based on the conducted research, it was found that in 20 out of 20 study subjects (all with sensitive skin), the repeated application of the product (within 4 weeks) did not cause any undesirable symptoms on the body skin such as redness, swelling, rash. In addition, 20 out of 20 subjects reported no uncomfortable sensations on the body skin i.e. itching, burning, tingling.

Based on the conducted research, it was found that when applied as intended, **Restorative Cream for Dry & Flaky Skin** product is safe for use in body skin care, especially dry, very dry or normal skin with dry areas. It can also be recommended for people with sensitive skin. It is suitable for people with skin prone to atopy and psoriasis. The above opinion does not apply to people who are allergic to any of the ingredients of the tested product.

SUMMARY

Based on the conducted research, the following was found about the tested product **Restorative Cream for Dry & Flaky Skin**:

1. It was well tolerated by sensitive skin, because in case in 20 of 20 subjects (all with sensitive skin) it did not cause irritation, redness or allergic reactions. In addition, it did not cause discomfort.
2. It fulfilled the expectations of the subjects in terms of organoleptic qualities, i.e.:
 - It has a proper consistency;
 - It has a pleasant fragrance with the proper intensity;
 - It applies and spreads easily;
 - It absorbs quickly and after absorption does not leave a sticky layer on the skin;
 - It is efficient.
3. The product once applied, it had a positive effect on the sensitive skin of the body. Based on the subjective feelings of the subjects, the following declarations of the Manufacturer were confirmed:
 - Gives a feeling of moisturizing the skin;
 - Reduces the feeling of dryness/ roughness;
 - Gives a feeling of smoothing the skin;
 - Gives softness to the skin;
 - Soothes and relieves irritation;
 - Leaves a palpable protective layer on the skin, protecting the skin from external factors (e.g. wind, hot/cold temperatures).
4. When used regularly for a period of 4 weeks (in accordance with the directions for use specified by the Manufacturer), it had a positive effect on the sensitive skin of the body. Based on the subjective feelings of the subjects, the following Manufacturer's declarations have been confirmed:
 - Moisturizes the skin;
 - Smooths the skin;
 - Gives a sensation of skin regeneration;
 - Reduces skin flaking;
 - Reduces the appearance of dryness/ dry areas on the skin;
 - Is suitable for daily care of body skin;
 - Improves the condition of the skin.
5. It can be recommended for daily body skin care, especially dry, very dry or normal skin with dry areas. It can also be recommended for people with sensitive skin. It can be recommended for people with skin prone to atopy and psoriasis.
